

# VIBRO SILVERBACK™ FEATURES & BENEFITS

## WORLD'S LARGEST PILEDRIVERS

Patent Breakthrough suppressor decrease weight while increasing line pull.

Suppressor is modular and can be removed to reduce suspended weight and height.

All new gear train incorporating 30 years of on the job experiences.

Silverback Technology delivers 50% longer run time and 30% more Drive Force without troublesome forced cooling/lubrication systems

Gearbox drilled to accept attachments manufactured by APE and other manufactures.

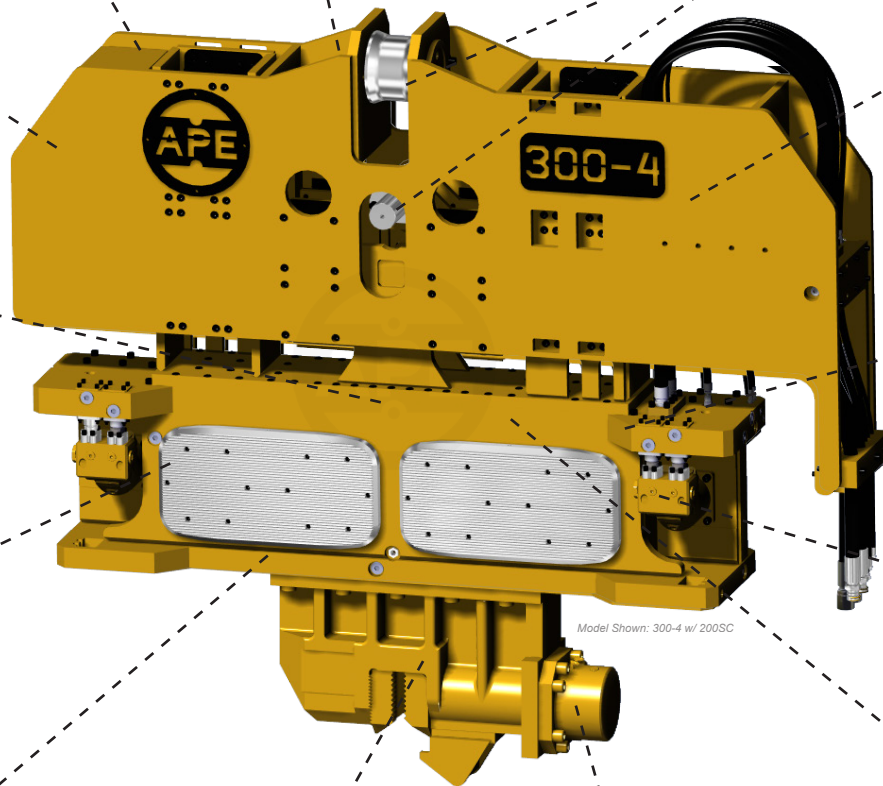

The APE vibros outperform other vibros in their class. They are lighter and allow more pull and reach.

The heavy duty lifting pin allows easy rigging, as well as removable for ease serviceability, tandem applications, and comes with two safety pins to ensure maximum safety.

Perfectly balanced, lower center of gravity enables the crane line to go slack without bending the piles.

Rifle bore top plate eliminates hoses that can cause serious downtime.

Recessed hydraulic motors eliminates the need for bolted on guards. Less parts = less problems

APE clamps are the safest available attachments to the foundation industry with the built in anti-release check valve

Heavy cylinder needs no guards and all hoses are tucked out of harms way. The one piece design eliminates rear seals, tie rods, & nuts.

Sealed gearbox for underwater operations

*APE provides a full line of high quality power units but our vibros will run off most correct sized power units.*
